Long ago, in South America,

a secret was unlocked for maintaining good health in the native plant, Yerba Maté. A beverage made from the leaves of this tree was discovered to benefit health, vitality and longevity. As a tea, it has been used for centuries to boost immunity, cleanse and detoxify the blood, tone the nervous system, restore youthful hair color, retard aging, combat fatigue, stimulate the mind, control the appetite, reduce the effects of debilitating disease, reduce stress, and eliminate insomnia, promoting overall good health.

The pleasantly stimulating effect of Yerba Maté gradually brings up your energy level, increases your ability to concentrate evenly, and has a long-lasting effect. We have found that although maté is incredibly energizing, it does not interfere with sleep cycles, but helps to balance them.

We have seen maté improve digestion and increase the immune response of the body, stimulating natural resistance to disease. Maté also supplies many of the nutrients required by the heart for optimum functioning. It increases the supply of oxygen to the body, especially during times of stress or exercise. Yerba Maté makes an excellent beverage that aside from all its nutritional properties, tastes good!

The drinking of yerba maté became the focal point of a culture famous for their hospitality and friendship. Make Yerba Maté part of your tradition and discover this key ingredient to whole body wellness.

"It is difficult to find a plant in any area of the world equal to Maté in nutritional value. It has most all of the vitamins necessary to sustain life."
